

Taxonomic lineage: Brachycera > Muscomorpha > Ephydroidea > Drosophilidae > Zaprionus > Zaprionus subgenus Zaprionus > armatus group > tuberculatus subgroup

Assembly: GCA_018904105.1_ASM1890410v1_genomic

5' motif: GCGGT 3' motif: ATCGC Internal max. Poly-T: 4nt Trailing-T: 14nt PSE: 0.89

[illegible][illegible]

Upstream promoter alignment showing conserved regions. Sequences include Pol III promoters (noeCR34335, Arthropod_7SK, 7SL, RNase_MRP, RNaseP_nuc, U6, U6atac, tRNAsec, snoRNAme18SA1806) and Pol II promoters (U1, U2, U3, U4, U4atac, U5, U7, U8, U11, U12, OrCD1). Conserved positions are highlighted in the alignment.
