## Drosophila maculinotata

Taxonomic lineage: Brachycera > Muscomorpha > Ephydroidea > Drosophilida > Drosophila > Drosophila subgenus Drosophila

Assembly: GCA\_035045305.1\_ASM3504530v1\_genomic

## 

Upstream promoter alignment showing conserved regions. Sequences include Pol III promoters (noeCR34335, Arthropod\_7SK, 7SL, RNase\_MRP, RNaseP\_nuc, U6, U6atac, tRNAsec, snoRNAMe18SA1806) and Pol II promoters (U1, U2, U3, U4, U4atac, U5, U7, U8, U11, U12, OrCD1). Conserved positions are highlighted in the alignment.
