## Drosophila prosaltans

**Taxonomic lineage:** Brachycera > Muscomorpha > Ephydroidea > Drosophilidae > Drosophila > Sophophora > saltans group > saltans subgroup

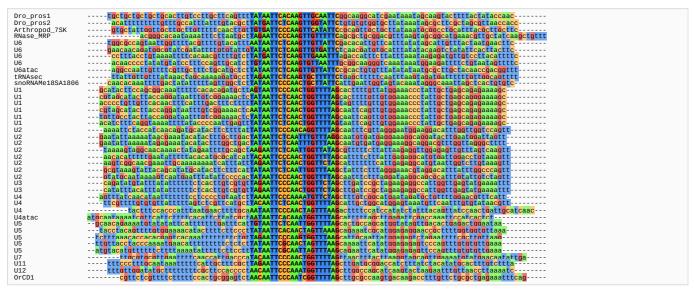

Assembly: GCA\_018151275.1\_ASM1815127v1\_genomic

## 

	Dro_pros1	Dro_pros2
Dro_pros1	-	32
Dro_pros2		-

Pairwise sequence identity matrix (%) showing similarity between IncRNA sequences.

Upstream promoter alignment showing conserved regions. Sequences include Pol III promoters (noeCR34335, Arthropod\_7SK, 7SL, RNase\_MRP, RNaseP\_nuc, U6, U6atac, tRNAsec, snoRNAMe18SA1806) and Pol II promoters (U1, U2, U3, U4, U4atac, U5, U7, U8, U11, U12, OrCD1). Conserved positions are highlighted in the alignment.
